

ACIDULATE 45T HF:

Organic Acid Cleaner

Need a high-foaming cleaner that will stay working even when exposed to air? Like Acidulate 45T, Acidulate 45T HF is a blend of organic acids and Humectants specifically designed to never “dry out” when exposed to air for long periods of time.

Acidulate 45T HF’s unique acid blend has been formulated to cut through urine scale by utilizing a combination of chelation, wetting agents and acidity.

This organic acid blend works well in the veterinary industries and has been shown to be incredibly effective for the chelation of mineral deposits.

Cleaning solutions can be neutralized while washing without precipitating mineral salts. Additionally, this remarkable product is extremely effective through a wide pH range and does not depend on creating a low pH to remove urine scale deposits.

POWERFUL

Incredibly effective against mineral deposits

FLEXIBLE

Does not depend on creating a low pH

SPECIALIZED

Specially formulated to never “dry out” when exposed to air

SAFE

Won't reduce the life of most plastic caging
