

# EZ Fogger XL

## XL Mobile Atomizer

The EZ Fogger XL is specially designed for atomizing and dispersing disinfectants in a variety of applications. Units are sturdy, compact and powerful. The EZ Fogger XL is convenient for short-term use, and can be connected to a metering pump for long-term use.

The EZ Fogger XL's centrifugal atomization produces billions of tiny, fog-like particles of disinfectant solution. As the fog is dispensed, and travels through the air the pathogens are neutralized.

This mobile fogger features a four position pivoting fogging head and powerful airflow propulsion. The fogging output is factory set at a maximum flow rate of 3.5 GPH, but it can be recalibrated by the operator for a variety of applications, such as humidification.

- **Nozzle-Free Atomization**
- **18 Gallon Tank with Large Lid Access**
- **Suitable for Outdoors**
- **Corrosion Resistant**
- **Arrives Fully Assembled**
- **Part Number: QLI-A-XE-ORSM-20**

# EZ Fogger Mini

## Mini Mobile Atomizer

The EZ Fogger Mini is a ready-to-operate unit that is ideal for smaller areas. Applications can include fogging emergency vehicles, and the components are UV stabilized so they won't break down in sunlight.

This centrifugal atomizer has a rear-feed blade system that quietly produces billions of tiny, fog-like particles that evaporate quickly. The unit's sump captures and recycles wastewater, eliminating the need for a drainage area. This feature conserves water, making this unit great for use in drought prone areas.

The EZ Fogger Mini uses a float valve to maintain the water level in the tank, a submersible pump to send water to the fogging head, and ball valve to control the fogging output. The EZ Fogger Mini comes equipped with an on/off power switch, 15' of water line, and a 12' power cord with plug.

- **Quiet Nozzle-Free Atomization**
- **Up to 4 GPH**
- **Easy Pivot Fogging Head**
- **Recycles Wastewater**
- **Stainless Steel Components**
- **Arrives Fully Assembled**
- **Part Number QLI-SS-700-BT**
