

ENVIRO-KLEEN®:

A Complete Line of Powerful Cleaners

Whether you're in the biomedical, pharmaceutical, food processing or animal care industries, having a re-circulating or batch washer detergent you can trust is an absolute necessity.

That's why we've made the Enviro-Kleen line, a family of cleaners that are specifically designed for re-circulating, batch and spray washers. These rapidly penetrating cleaners work fast to remove strongly adherent, oily, fatty and stubborn soils, leaving you with a thoroughly clean surface, free from build up.

In addition to being powerful cleaners that can handle the toughest jobs, the Enviro-Kleen line of cleaners are also free from polluting phosphates, and are not risks for biological persistence or bioaccumulation. All components of our cleaners are biodegradable and break down harmlessly, so that you can clean your facility without worrying about your environmental impact.

ENVIRO-KLEEN 100: Chemically Balanced

Enviro-Kleen 100 is a chemically balanced compound designed specifically for re-circulating spray washing systems. This detergent rapidly penetrates, loosens and softens heavy soil and baked-on residue. Enviro-Kleen 100 is also phosphate free, can be used to neutralize our Acidulate products and controls water hardness by sequestering calcium and magnesium in the water.

Contact a Quip Labs representative today to get started with Enviro-Kleen 100 in your facility!

Packaging:

Packaged in 5, 15, 30 and 55 gallon containers.

Industries:

Biomedical Research,
Pharmaceutical
Production, Companion
Animal Care,
Food Production

Uses:

A whole family of
cleaners for batch
and re-circulating
washers

Handling:

Keep container out of
heat and direct sun-
light.
