

# ENVIRO-KLEEN®:

## A Complete Line of Powerful Cleaners

Whether you're in the biomedical, pharmaceutical, food processing or animal care industries, having a re-circulating or batch washer detergent you can trust is an absolute necessity.

That's why we've made the Enviro-Kleen line, a family of cleaners that are specifically designed for re-circulating, batch and spray washers. These rapidly penetrating cleaners work fast to remove strongly adherent, oily, fatty and stubborn soils, leaving you with a thoroughly clean surface, free from build up.

In addition to being powerful cleaners that can handle the toughest jobs, the Enviro-Kleen line of cleaners are also free from polluting phosphates without being risks for biological persistence or bioaccumulation. All components of the cleaners are biodegradable and break down harmlessly, so that you can clean your facility without worrying about your environmental impact.

### Packaging:

Packaged in 5, 15, 30 and 55 gallon containers.

### Industries:

Biomedical Research,  
Pharmaceutical  
Production, Companion  
Animal Care,  
Food Production

### Uses:

A whole family of  
cleaners for batch  
and re-circulating  
washers

### Handling:

Keep container out of  
heat and direct sun-  
light.

# Meet the Complete ENVIRO-KLEEN® FAMILY

## ENVIRO-KLEEN 100

**Enviro-Kleen 100** is a chemically balanced compound designed specifically for re-circulating spray washing systems. This detergent rapidly penetrates, loosens and softens heavy soil and baked-on residue. Enviro-Kleen 100 is also phosphate-free, can be used to neutralize our Acidulate products and controls water hardness by sequestering calcium and magnesium in the water.

## ENVIRO-KLEEN 1200

**Enviro-Kleen 1200** is a phosphate-free, chlorinated cage and bottle washing compound designed specifically for re-circulating and batch washers. As with all members of the Enviro-Kleen family, Enviro-Kleen 1200 is biodegradable and free of polluting phosphates.

## ENVIRO-KLEEN 900S

**Enviro-Kleen 900S** is a heavy-duty chlorinated cage and bottle washing compound, designed specifically for re-circulating and batch washers. Enviro-Kleen 900s rapidly penetrates and removes strongly adherent, oily, fatty and pertinacious soils while keeping your facility free from pollutants.

## ENVIRO-KLEEN 500N

**Enviro-Kleen 500N** is a highly alkaline product designed to efficiently neutralize acid solutions in re-circulating washers and tunnel washers. Enviro-Kleen 500N contains potassium hydroxide, and can render acid solutions non-corrosive.
