

IODEX® HAND SOAP: Cleaner and Sanitizer

Iodex Hand Soap is an excellent addition for all Animal Care and Animal Research Facilities, where cross contamination must be prevented. This product is a one-step disinfecting hand soap for topical use by animal caretakers and laboratory personnel.

While Iodex Hand Soap is not an EPA registered product, it is extremely effective against the following: *S. aureus*, *S. typhi*, *S. pyogenes*, *S. uberis*, *S. dysgalactiae*, *S. agalactiae*, *E. coli*, *E. aerogenes*, *P. aeruginosa*, *K. pneumoniae*. (Test results available upon request.)

Iodex Hand Soap is packaged in 16 ounce pump or squeeze bottles, 1 gallon "Flat Top" bottles (for wall mounted dispensers) and regular 1 gallon bottles with an available dispensing pump.

Despite using a detergent that is mild enough for skin, Iodex Hand Soap is highly effective for removal of animal fats and other organic soils, and also contains an iodine complex that has been found to kill a broad spectrum of pathogens.

POWERFUL

Contains an iodine complex that has been found to kill a broad spectrum of pathogens

ECO-FRIENDLY

This product is free of polluting phosphates, and breaks down into harmless substances.

FAST

Works quickly to break down animal fats and organic soils on the skin

READY TO USE

Iodex Hand Soap is available in convenient, ready to use packaging.

IODEX® HAND SOAP: Effective and Easy

Despite being much more effective for industries that deal with animals, Iodex Hand Soap is applied no differently than any other hand soap.

Iodex Hand Soap should be dispensed sparingly to pre-wet skin and washed with hands until full lather develops. Just as with normal soaps, special attention should be given to cleaning finger nails and use of a nail brush is recommended.

If hands are especially soiled, feel free to re-apply and repeat the procedure for a complete sanitizing effect.

Ask your regional representative today whether Iodex Hand Soap is the right choice for your facility.

Packaging:

Packaged in 16 ounce bottles, 1 gallon "Flat Top" bottles, and regular 1, 5, 15, 30 and 55 gallon containers

Handling:

Keep container closed at all times when not in use and keep container out of direct sunlight.

Industries:

Iodex Hand Soap can be used across a wide variety of industries

Uses:

Iodex Hand Soap is a mild detergent and hand sanitizer.
