

Sani-Plex 128M[®]:

Disinfectant Cleaners

Sani-Plex 128M is a multi-purpose, neutral pH, germicidal detergent and deodorant effective in hard water up to 400 ppm (calculated as CaCO₃) in the presence of a moderate amount of soil (5% organic serum) according to the AOAC Use-Dilution Test.

The Sani-Plex M product line is available in three dilution rates; 2oz, 1oz and 1/2oz. They contain no added dyes or fragrances and maintain a neutral pH when properly proportioned into solution.

The Sani-Plex M series is perfect for general traffic hallways and animal holding rooms, floors and walls throughout a facility.

Also, when properly proportioned they do not require a post application rinse. We always recommend the Sani-Plex M series disinfectants be proportioned through a properly titrated dispensing system.

POWERFUL

Rapid, effective microbial kill, even in the presence of heavy bioburden

FAST

Eradicate microbes, disinfect, sanitize and oxidize pollutants within minutes

VERSATILE

Sani-Plex 128M is effective in hard water up to 400 ppm

SAFE TO USE

Sani-Plex 128M is easy and safe to use so you can rest at ease.
